LIQUID CHALKBOARD

The ultimate versatility

LIQUID CHALKBOARD

Traditional black and green chalkboards have been utilized for years in the educational system, but with the creation of the liquid chalk markers, times have changed. These vivid chalk inks have inspired new and creative ways to utilize chalkboards. From restaurants to the do-it-yourself spaces, everyone seems to be utilizing chalkboard panels. The problem with traditional chalkboards and chalkboard paint, is that the surface is very porous and some of the liquid chalks will remain in the pores leaving behind an image — this is called ghosting. To remedy this issue, Panel Processing has developed a smooth water-based liquid chalkboard coating that will erase away your images with just a wet rag or liquid chalk ink remover, depending upon chalkboard color and pen. Regular chalk can be used on liquid chalkboards too, giving you the ultimate versatility!

Advantages

- Wipes away easily - no ghosting like traditional chalkboards
- Smooth printable surface for digital or screen printing
- Custom colors...You don't have to have traditional black!
- Water-based coating for an eco-friendly rigid substrate
- No chalk mess
- Biodegradable and recyclable

Technical Specifications

- Water based liquid chalkboard coating on a wood substrate
- Available on MDF or tempered hardboard
- 1/8" - 3/4" thicknesses
- Full sheets or cut-to-size
- Standard black and green chalkboard
- Custom colors made to order
- Screen printing available

Let's add COLOR!

Digital Printing on Chalkboard

We recommend The Original Chalk Ink® on our Liquid Chalkboard. To clean Liquid Chalkboard you can simply use water to remove the ink or Chalk Ink® Spray Cleaner.

Panel Processing can match "All the Colors of the Rainbow" for your project. With the vibrant colors of the liquid chalk markers you can step away from traditional black or green chalkboard. PPI Coatings, our in-house paint company, will match your special color. Name the color and we will make it!
