

# CHALKBOARD CARE & CLEANING

Chalkboard panels have been utilized for schools, colleges and institutions for years and Panel Processing has been a leading producer. Today you will see chalkboards of all shapes, colors and sizes being used in all sorts of places. On children's furniture, cafe walls and ceilings; it's definitely utilized more than ever.

## Breaking In

For best results, it's essential to break-in your Panel Processing Chalkboard. Cover the entire surface with chalk. Use the side of a piece of white, dustless chalk. Never use chalk with a glazed, hard surface. Work the chalk into the surface using an all-felt eraser. Repeat steps. Wipe the board with a soft, dry lint-free cloth or chamois cloth.

## Cleaning

For best results, "dry" clean the chalkboard. Erase the entire surface with an all-felt eraser and wipe with a soft, dry, lint-free cloth or chamois cloth. To remove stubborn stains (such as fingerprints, crayon, pencil, etc.) use water and a mild, non-abrasive, non-oily cleaner that does not contain ammonia. Rinse with water and dry immediately.

**A Note of Caution:** Water will not harm the board surface but it does combine with the chalk to produce a glazed, slick finish that is unfit for writing. This condition can develop on any chalkboard surface. After water is used, it is important to dry the surface immediately and repeat the break-in instructions.

## Chalkboard

Our products meet the levels for lead and phthalates specified in the Consumer Products Safety Improvement Act of 2008, sections 101(a) (2) (C) and section 108. Independent test results from an accredited CPSC lab are available upon request. Call an account manager at 800-433-7142 to request a copy.

## Panel Processing, Inc. Chalkboard

Panel Processing, Inc. is America's foremost flat panel fabrication and coating specialist. For schools, colleges, office products and institutions, we supply a quality chalkboard product that meets rigid Mallis and Dehart architectural standards. Also used in learning aids, toy and game products and juvenile furniture, our chalkboard has numerous applications and can be combined with dry erase markerboard.

Sheet sizes are available from 4' x 6' to 4' x 10' or cut-to-size and machined to your exact specifications. Green and black are available as well as any custom-matched color. We also offer screen-printing on chalkboard. Visit [www.panel.com](http://www.panel.com) to learn more about our fabrication and coating solutions.
