

PARTICLEBOARD SLATWALL

Different Cores for Different Budgets

A new option is available for our Slatwall product line, particleboard! We are utilizing a Slatwall Grade 3/4" Particleboard in 49"x 97" sheets, which has a higher internal bond for increased strength over our standard particleboard. With a quality surface we can still provide all our melamine papers, foils and high pressure laminates on particleboard.

The Details
