

PEGBOARD PANELS & COMPONENTS

Panel Processing was founded over 50 years ago as the nation's leading Pegboard supplier. Although our product offering has grown immensely, Pegboard is still one of our staple products. Pegboard is ideal for displays, gondola backers, storage solutions and more. As a commercial Pegboard manufacturer, we can provide Pegboard as individual panels to be used on walls or designed and cut into custom components for display assembly. Panel can also manufacture and assemble Pegboard displays for your retail environment or storage requirements. All our Pegboard is made to order and designed to your needs.

The Details
